Table 4: Communication Advantages and Disadvantages of Inpatient PM&R Settings

<table>
<thead>
<tr>
<th>Setting</th>
<th>Advantage</th>
<th>Disadvantage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stand Alone Acute Rehabilitation Hospital</td>
<td>Clear Leadership Structure (physiatrist is the final decision maker)</td>
<td>Decreased Availability of Consulting Physicians and Ancillary Staff</td>
</tr>
<tr>
<td>Rehabilitation Unit in a Large Acute Care</td>
<td>Availability of Consulting Physicians</td>
<td>Confusion May Arise with Regards to Whom is the Primary and Final Decision-</td>
</tr>
<tr>
<td>Hospital</td>
<td>Uniform Electronic Medical Record Easily Accessible to all Members of the Care Team</td>
<td>Maker</td>
</tr>
<tr>
<td>Long Term Care Facility Skilled Nursing</td>
<td>Clear Leadership Structure (Hospitalist /Internist are the Primary Physician)</td>
<td>Decreased Availability of Consulting Physicians and Ancillary Staff</td>
</tr>
<tr>
<td>Facility</td>
<td></td>
<td>Interdisciplinary Meetings held Less Frequently Could Affect Team Dynamics, Communication and Discharge Planning</td>
</tr>
</tbody>
